ABSTRACT OF THE DISCLOSURE

The present invention relates to substances capable of specifically inhibiting Ala-pnitroanilide-cleaving peptidases and Gly-Pro-p-nitroanilide-cleaving peptidases as
well, for a use in the medical field. Furthermore, the invention relates to the use of
at least one of such substances or of at least one pharmaceutical or cosmetic
composition containing at least one such substance for a prophylaxis or a therapy
of diseases, particularly for a prophylaxis and a therapy of diseases accompanied
by an excessive immune response (autoimmune diseases, allergies, transplant
rejections), of other chronic-inflammatory diseases, of neuronal diseases and
cerebral damage, of skin diseases (inter alia acne, psoriasis), of tumor diseases
and of specific virus infections (inter alia SARS).
